PROFILE

Application Development graduate with full-stack and data analytics skills (React, Java, Spring Boot, Python, SQL). Experienced in building scalable applications and solving real-world problems. Seeking a role as a Software or Data Engineer to apply expertise, grow professionally, and contribute to meaningful projects.

EDUCATION

Cape Peninsula University of Technology   01/2023 – 12/2025
Diploma: Application Development   Cape Town, South
Currently completing the final year of a diploma in Application Development,   Africa
with hands-on experience in full-stack development, database design, and
software engineering principles. Developed practical projects including a
timetable system (Java, Derby, Swing) and a student marketplace (React,
Spring Boot).

SKILLS

Programming Languages: **Frontend Development:**   **Databases:**
- Java, Python, SQL, JavaScript,   - React, HTML , CSS   - SQL, MySQL, SQLite, Derby
  Springbot, RESTful API

Data Analytics:
- Excel(basics), basic Python
  analytics

PROJECTS

Student Market   04/2025 – Present
React & Spring Boot Full-Stack Application
Developed a full-stack web application enabling students to buy and sell items
within a marketplace. Built frontend using React and backend with Spring
Boot, integrating a database for user accounts, listings, and transactions.
Currently improving UX for better usability and implementing security
features.

Timetable Management System   03/2024 – 09/2024

Java Swing & Derby Database Application

Successfully created a fully functional timetable management application that
improved scheduling efficiency and reduced manual errors. Gained practical
experience in full-stack development, database management, and GUI design.
The project demonstrated the ability to deliver a complete software solution
from design to implementation.

PROFESSIONAL EXPERIENCE

Capacit ✎   06/2025 – Present

Data Analyst Trainee   Cape Town , South
                                                                           Africa
Completed a training program focused on developing core data analysis skills,
including data collection, cleaning, visualization, and interpretation. Gained
hands-on experience using Excel and Python for analytics and reporting,
preparing for a career in data analysis.
